DETAILED ACTION
EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 1,

- line 12, "one" has been deleted;
- line 19, "the" before "color mixing effect" has been changed to -a--.

In claim 9,

- line 14, "components" has been changed to -component--;
- line 21, "the" before "color mixing effect" has been changed to -a--.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a wheel rim device with patterned light capable of automatically generating electric power, having, inter alia, a programmable chip disposed on a circuit board and connected with a rectifier/filter circuit and light emitting components to drive said light emitting components to generate various glittering and jumping dynamic variations for accomplishing the effect of persistence of vision according to different timings of the output waveform of said programmable chip when said rectifier/filter circuit outputs a DC voltage, a color mixing effect being also accomplished between

said light emitting components to display different color lights (claims 1 and 9). The remaining claims 2-8 and 10-16 are allowed by virtue of their dependencies on the independent claims. Hence, the examiner has allowed claims 1 through 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Cheung, Patent No. 6,565,243; Molinaroli, Patent No. 6,265,984; Lys et al., Patent No. 6,340,868; Luo, Patent No. 6,749,321.

None of the above patents discloses the wheel rim device as recited.
